- At a funeral, the deceased rises up and accuses someone present murder.
- A murdered child rises from his grave to get revenge.

The impostor among us

There was a time when in the Balmaceda's family ruled the peace and the joy. But, on the 11th of October, everything turned into sadness and suffering. The grandmother of the family died in a car crash, leaving the kids and their parents with an enormous depression. The grandmother was so loved in the family that, because of her death, his son came with a very strange and risky idea. Since he was a scientist, he thought that it could be a chance for cloning her. Using her body, he tried to replicate her DNA and transpass it to another dead corpse. Surprisingly, the plan worked out, and all of the memories of the grandmother were on their neighbour, Mrs. Rodriguez.
