HURRICANE!

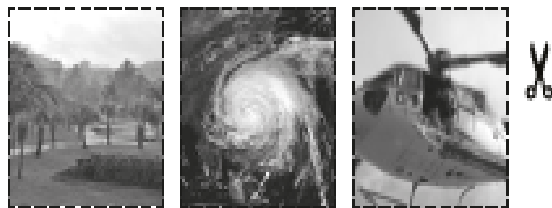

This man likes hurricanes. He's flying into a hurricane with his camera.

The eye is the centre of the hurricane. It isn't windy there.

A hurricane is a big storm. There's a lot of wind and rain. The hurricane goes around in a big circle. It can knock down trees and houses. There are big waves on the sea, too.

There are hurricanes in the summer and autumn. In North and Central America, they are 'hurricanes,' but in Asia, the name for these big storms is 'typhoons.' And in Australia, the name is 'cyclones.'

- Do you like hurricanes?
- When and where are there hurricanes?
- What is a hurricane?
- What's the eye of a hurricane?

COME ON!! YOU CAN DO IT!!!
