## HYENAS AND BABOONS

Hyenas are fast. They can run at 60 km/hour and they can run for a long time. Baboons can run at 48 km/hour.

Some baboons live near cities. They sometimes get food from people, so they aren't scared of us. Hyenas are usually nervous when they see people.

Hyenas aren't good at climbing trees. Baboons don't live in trees like other monkeys, but they sometimes climb trees to sleep or eat.

Hyenas are dangerous for people. They eat other animals, and they sometimes (but not often) eat people too, if they don't have any other food! Baboons have got big teeth and they can look scary, but they aren't often dangerous for humans.

Some baboons are brown, some are yellow and some are grey and white with pink faces. Many baboons have red bottoms! Hyenas are brown, black and grey.
