

# Rhythm, Melody and Dissonance

# Rhythm

# Rhythm

- Rhythm is a combination of sounds of different durations that repeats consistently.
- Focuses on the **timing, beat, and pattern** of sounds in music.

# Melody

# Melody

- Melody allows us to identify sequences of notes that create a musical tune.
- Creates a **musical phrase**. It's the "tune" you remember in a song.

# Dissonance

# Dissonance

- Dissonance occurs when there is a **tension between sounds and they do not go well together.**
- Think about in a scary movie when you know something bad is going to happen
