Spanish Education System

Spanish Education System

Organic Law on Education 2/2006 (LOE), in force since 2006, modified by *Organic Law 3/2020 (LOMLOE)*.

Key features:

- It places **children's rights** on top of the guiding principles of the system.
- It promotes **gender equality**.
- It encourages the **continuous improvement of schools** and the **individualisation of learning**.
- It gives a central role to the development of **digital competence**.
- It recognises the importance of education for **sustainable development**.

Spanish Education System

Administration:

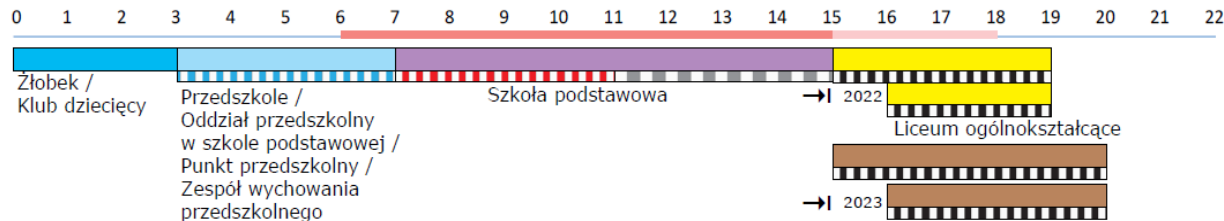

- **Decentralisation:** educational competences are shared between the General State Administration (MEFP) and the authorities of the autonomous communities:
- Schools have pedagogical, organisational and management **autonomy** for their resources.
- Participation of the **education community** (parents associations, town halls, etc.) in the organisation, management and evaluation of schools.

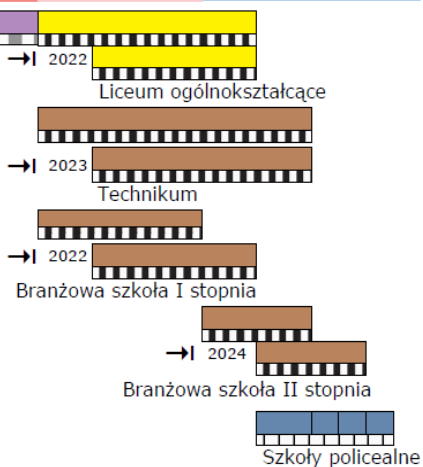

Polish Education System

Age of students

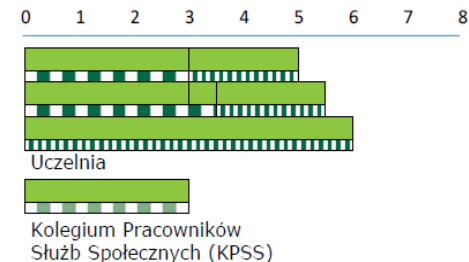

Main changes

1. New types of secondary schools (4-year *liceum ogólnokształcące*, 5-year *technikum*) have been operational since 2019/20 school year for graduates of 8-year single structure education (*szkoła podstawowa*). 'Old type' programmes in 3-year *liceum ogólnokształcące* and 4-year *technikum* for graduates of phased out *gymnasia* still operate in *liceum ogólnokształcące* up to the year 2021/22 and in *technikum* – up to the year 2022/23.
2. In 2021/22, the new 2-year *branżowa szkoła II stopnia* (secondary school) offers a programme for students who followed the pre-reform structure – namely graduates of phased out *gymnasia* who graduated from *branżowa szkoła I stopnia*. In 2022/23, a new programme will be offered to graduates of post-reform structure – namely 8-year single structure education (*szkoła podstawowa*) who graduated from *branżowa szkoła I stopnia*.

Programme duration (years)

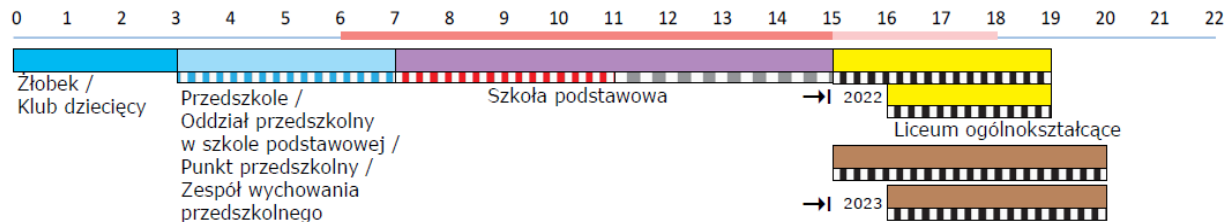

Note: Major changes at different education levels gradually take place between 1 September 2017 and the school year 2022/23 (Act of 14 December 2016 'Law on School Education' and an Act 'Legislation introducing the Act – Law on School Education').

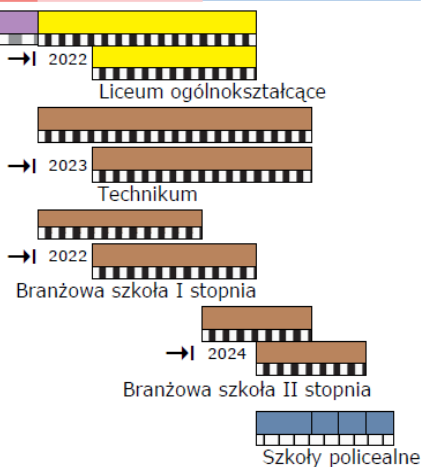

Polish Education System

Age of students

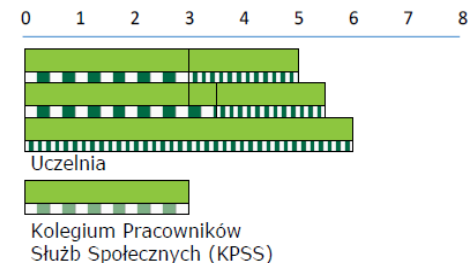

Main changes

- New types of secondary schools (4-year *liceum ogólnokształcące*, 5-year *technikum*) have been operational since 2019/20 school year for graduates of 8-year single structure education (*szkoła podstawowa*). 'Old type' programmes in 3-year *liceum ogólnokształcące* and 4-year *technikum* for graduates of phased out *gymnasia* still operate in *liceum ogólnokształcące* up to the year 2021/22 and in *technikum* – up to the year 2022/23.

In 2022/23, a new programme will be offered to graduates of post-reform structure – namely 8-year single structure education (*szkoła podstawowa*) who graduated from *branżowa szkoła I stopnia*.

Programme duration (years)

Key features:

- Combination of **centralised laws/regulations** (Ministry of Education) and **decentralised school administration** (local authorities)
- External examinations** at the end of compulsory education (single 8-year structure) and on completion of general and vocational upper secondary schools. The examination is obligatory for all students.

Challenges in Spanish Education

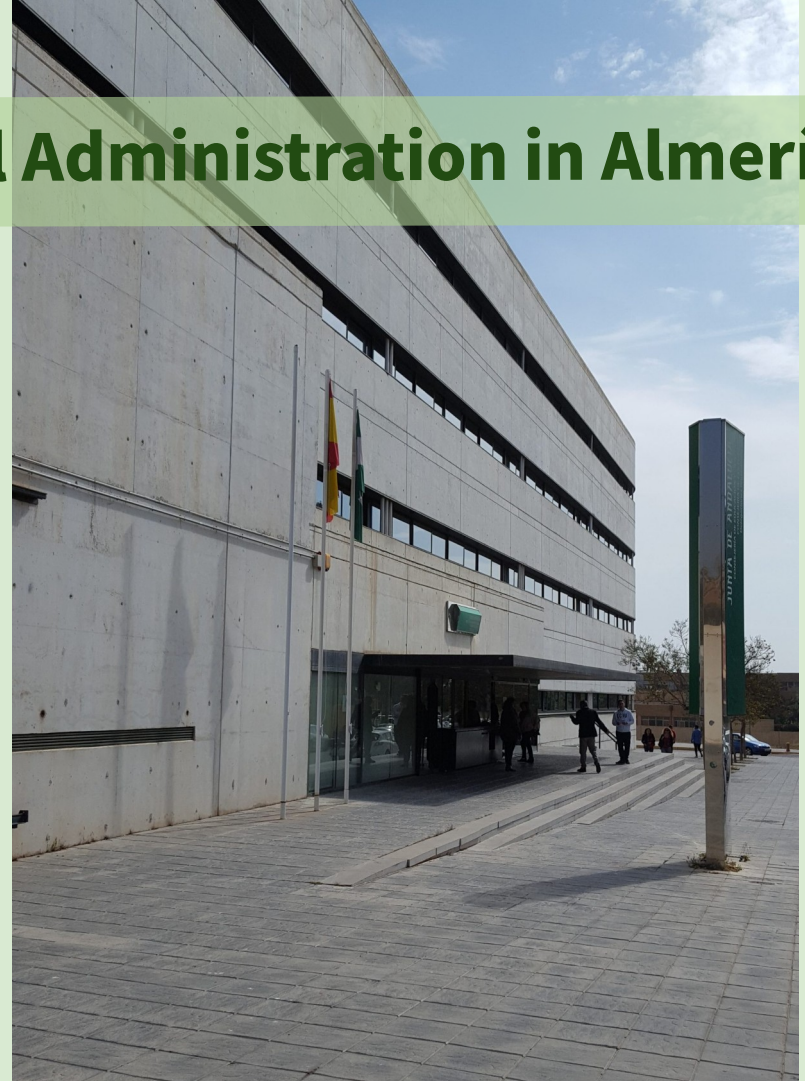

Challenges in Spanish Education

1. Prioritise modernisation and flexibilisation.
2. Improve students' competence levels and compensate for initial disadvantages.
3. Modernise **Vocational Training** and improve enrolment and qualification rates.
4. Reduce **early school drop-out** and facilitate **reintegration**.
5. Update the teaching profession to lead **methodological and curricular innovation**.
6. Guarantee **education in civic values** to enable critical thinking and participatory citizenship.
7. Give **more individual attention** for educational achievement.
8. Improve the scope and quality of 0-3 education.
9. Guarantee investment in education and scholarships.
10. Increase **STEM vocations**, especially among female students.
