NEPTUNE

MOON

It's the biggest star in the Solar System. It's in the centre.

It's the smallest planet in the Solar System. It's the closest planet to the Sun.

It's the second planet from the Sun. It's got a lot of volcanoes. It's very hot!

It's our home planet. It's the third planet from the Sun. It's called the blue planet because it has got a lot of water.

It's the fourth planet from the Sun. It's also called the red planet because of its colour. It's very cold.

It's the fifth planet from the Sun. It's the biggest planet in the Solar System. It has got 92 moons!

It's the sixth planet from the Sun. It has got 93 moons and 7 big rings.

It's the seventh planet from the Sun. It's the coldest planet in the Solar System. It spins on its side!

It's the eighth planet from the Sun. It has got 6 rings, but they are very difficult to see.

It's a satellite. It orbits the Earth and you can see it at night.
