

LA ATMÓSFERA

Apenas hay oxígeno.

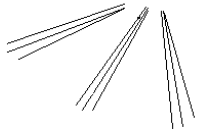

7- naves espaciales

8- satélites artificiales

PARTE ALTA

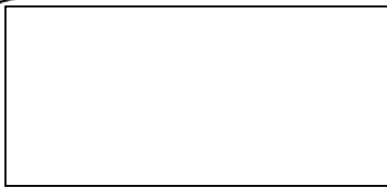

6- rayos cósmicos

5- estrellas fugaces

4- avión supersónico

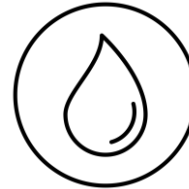

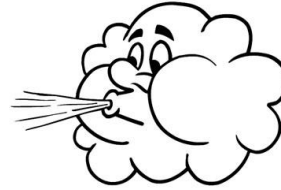

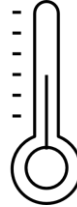

Aire: pesa, pero no tiene color, sabor, ni forma concreta.

Aire: Nitrógeno, oxígeno, dióxido de carbono y vapor de agua.

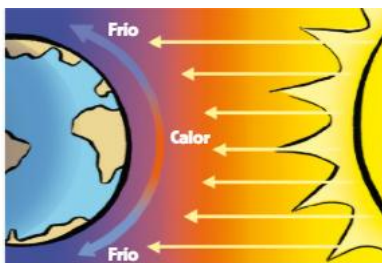

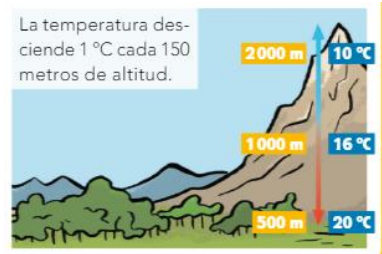

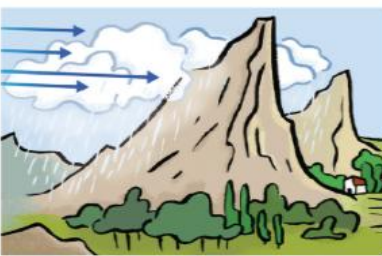

PARTE BAJA

LOS FENÓMENOS ATMOSFÉRICOS

LOS FACTORES CLIMÁTICOS

	
<p>La temperatura desciende 1 °C cada 150 metros de altitud.</p> 	
	
	

LOS TIPOS DE CLIMA

Océánico	
Continental	
Continental - mediterráneo	
Mediterráneo	
De montaña	
Subtropical
