

In England, María meets Todd. A Californian boy that studies in the Massachusetts Institute of Technology. He tells her about how is living and studying in the best Scientific University in the world

María: and how is life there Todd? Do you study all day?

Todd: No, I have a regular schedule, like everyone else. Every day I go to class and study Mathematics, Physics, Biology, Geology and Computer Programming

María: and what do you do in your free time?

Todd: We have a lot of interesting things to do. There is a fitness centre in the Campus. I usually go on Mondays and Wednesday, but sometimes I also go there on Thursdays. Almost every weekend, there are also parties in the city. We seldom stay on the dorms alone and bored. Only when we have to study.

María: Talking about dorms, how do you go to class Todd?

Todd: I go by bicycle, but sometimes I also go by bus when there is not enough time or I'm late to class

María: Do you work in some interesting project now Todd?

Todd: yes, now I work on a new Spaceship for the NASA. It's a pretty complicated project, and there are a lot of Aerospace Engineers working with us; they are German, French, Japanese, and also British.

María: And what are you doing now here in England Todd? Todd: Now I'm on holiday

1. Answer to the following questions using your own words and complete sentences:

a) Where does Todd study?

b) Does Todd usually get bored in the University?

c) Does Todd practice exercise? When?

2. According to the text, say if these sentences are true (T) or false (F):

a) Todd studies in one of the best universities in the world.
