

**NUTRITION
CLIL Unit 2023/24
IES Vega de Atarfe**

**THE DIGESTIVE SYSTEM
Accesory Glands**

Match the glands to the correct information

SALIVARY GLANDS:

they produce saliva

SALIVARY GLANDS:

the enzyme they produce
helps break down food
before it reaches our
stomach

GALL BLADDER:

it stores bile

GALL BLADDER:

Bile facilitates digestion and
the absorption of lipids

LIVER:

it produces bile

LIVER:

it is the largest accessory gland

LIVER:

It has many functions: synthesize proteins, store vitamins and minerals ...

PANCREAS:

it is a long organ

PANCREAS:

it produces pancreatic juices

PANCREAS:

These juices help digest proteins, fats, and carbs; it produces insulin
